

MACC's Credit Card Processing

Fast, secure, and convenient

Processing credit cards online has never been easier, or more secure. MACC customers are able to process and verify credit card payments in cooperation with a third party payment processor.

MACC has teamed with several partners to offer convenient and secure online credit card payment processing. The system is simple to use and economical to deploy. Our partnerships allow us to offer an accurate, flexible billing solution supporting leading-edge service delivery and technology.

Payment processing options

Customer Master users can process and verify credit card payments online using the following methods:

- **Automated** - Recurring payments entered via Customer Master's Credit and A/R system
- **Online** - Automated payments via online subscriber payments
- **Manual** - Payments entered into Customer Master and then processed online

System requirements

It's likely you have the basic workstations involved in the processing. You must have a connection to the Internet via Microsoft® Internet Explorer 6 or later version. MACC will provide modifications to your Customer Master server and individual workstations.

Please note: To use this service, a signed proposal with MACC and a signed contract with one of our payment processing partners must be in place. Use of the credit card processing system is optional and includes a fee.
